1. I believe the decision to sell off Edmonton's electrical generating assets should not have been made in secret without public consultations.

Yes

As representatives of Epcor's shareholders (IE the citizens of Edmonton), council has an obligation to be open and accountable to Edmontonians when making such decisions

2. As a representative of the Citizens of Edmonton who are the sole shareholder of EPCOR, I will not support the sell off of any other assets (electrical transmission, water, waste water) that serve the citizens of Edmonton, without full public consultations

Yes

3. I believe the next City Council should have an independent investigation of the decisions surrounding the sell off of our electrical generating assets, as provided for in the Unanimous Shareholders Agreement with EPCOR

No Response

4. As a city councillor, I will do everything in my power to explore how the City can maintain ownership and control of the electrical generating assets that serve the Citizens of Edmonton.

Yes

1. I believe the decision to sell off Edmonton's electrical generating assets should not have been made in secret without public consultations.

Yes

There's no reason for secrecy that could be a benefit to the public.

2. As a representative of the Citizens of Edmonton who are the sole shareholder of EPCOR, I will not support the sell off of any other assets (electrical transmission, water, waste water) that serve the citizens of Edmonton, without full public consultations

Yes

As above.

3. I believe the next City Council should have an independent investigation of the decisions surrounding the sell off of our electrical generating assets, as provided for in the Unanimous Shareholders Agreement with EPCOR

Yes

4. As a city councillor, I will do everything in my power to explore how the City can maintain ownership and control of the electrical generating assets that serve the Citizens of Edmonton.

No

Not everything in my power, but certainly if these statements are true then closer watch is called for.

1. I believe the decision to sell off Edmonton's electrical generating assets should not have been made in secret without public consultations.

Yes

I agree in public consultation, period. The only thing I'd say is that council members with much credibility told me they were convinced of the need for privacy in their decision. They were not only warned that as shareholders they were legally required to stay silent, but also warned that the values of Epcor would suffer if they talked. They were caught in a no-win situation. So I don't want my support of public decision-making to be seen as a criticism of incumbents.

2. As a representative of the Citizens of Edmonton who are the sole shareholder of EPCOR, I will not support the sell off of any other assets (electrical transmission, water, waste water) that serve the citizens of Edmonton, without full public consultations

Yes

Council must engage citizens each term with public hearings on the status of Epcor. Council could talk about market conditions and potential outcomes and get feedback from citizens. These regular meetings would allow council to get updates on the public's attitudes towards this key public asset.

3. I believe the next City Council should have an independent investigation of the decisions surrounding the sell off of our electrical generating assets, as provided for in the Unanimous Shareholders Agreement with EPCOR

Yes

Agreed. I don't see this so much as a witch hunt as a way for council to clear the air. The public will be able to better judge the decision they made. Councillors should welcome this as a way to not just clear the air, but protect the reputation and integrity of civic government.

4. As a city councillor, I will do everything in my power to explore how the City can maintain ownership and control of the electrical generating assets that serve the Citizens of Edmonton.

Yes

Difficult question. I suppose if the merits of sale were so advantageous to current and future citizens I'd have to consider the decision. But my bias would be in maintaining control of our power assets.
